Verizon Family Locator

Order now!

With Family Locator it's easy to know where your family is. Simply use your mobile device or the Web to view the location of family members with Family Locator-capable devices. Your family members' location information will be displayed on a detailed map.

Family Locator can even work together with VZ Navigator to give you turn-by-turn directions to meet those family members you've located.

And with arrival and departure updates you can set predetermined locations - like school, home, and soccer practice - then get an instant update when your family members enter or leave the location.
